DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 and 8-11, drawn to methods for keeping copies of data, wherein a primary database receives and sends database events, classified in class 707, subclass 200.
 - II. Claim 7, drawn to a method for exchanging messages in a networked system, classified in class 709, subclass 238.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a hardware or software handshake between computers or other devices wherein signals indicating the readiness of each device to send or receive data are exchanged.

The invention II also allows ping packets to be sent from a node to a computer in a network that determine ability of the node to send and receive transmissions. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Horace Ng on June 22, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
